

Features & Benefits

SOCIAL

PROFILES

Add your professional background and skills to your profile. Find co-workers with related or relevant knowledge and experience, and connect to others in your organization through the people directory.

ACTIVITY STREAMS

Keep up to date on the information and activities in your spaces, and follow the activities of the people with whom you are connected.

SPACES

Create your own collaboration spaces with dashboards, discussion forums, calendars and documents. Allow any user to create a space and invite other users to join.

OPENSOCIAL

Build social apps thanks to the OpenSocial-compliant gadget container, which supports OAuth and OpenSocial REST APIs.

COLLABORATION

WIKI

Meeting minutes, documentation, action plans, reports, a knowledge base and notebooks are some of the popular uses of the full-featured enterprise wiki, which eases knowledge capture and sharing.

CALENDAR

Create personal, group and shared calendars with free/busy status, reminders and tasks. Sync eXo calendars with an existing calendar through iCal or CalDAV.

FORUM

Support, brainstorm, solicit new ideas or run polls with our full-featured enterprise message board with built-in security, ratings and moderation.

COLLABORATIVE FAQ

Let your experts spread their knowledge using a collective Q&A, where the best questions and answers will surface through the built-in answer rating system.

ENTERPRISE PORTAL FRAMEWORK

STANDARDS BASED

Our JSR-286 portlet and OpenSocial containers let you integrate your own apps that have been developed with your favorite framework (including JSF, Spring and GWT).

CUSTOMIZABLE

Page and layout management is easy using drag-and-drop and WYSIWYG editors. The Platform is highly skinnable and you can implement a website with any brand design.

MULTILINGUAL SUPPORT

There is a growing list of supported languages including English, French, German, Italian, Portuguese and Arabic. eXo is easy to localize and has full support for right-to-left text.

ROLE-BASED DELIVERY OF CONTENT AND APPS

Role-based policies aggregate and display pages, content, gadgets and portlets depending on a logged-in user's roles.

WEB RESOURCE MANAGEMENT

eXo optimizes JavaScript and CSS resources by isolating and minimizing them automatically.

CONTENT MANAGEMENT

WEBSITE CREATION

Build advanced websites by developing or extending templates. Combine inline editing with a powerful back office and a flexible publication workflow.

CONTENT EDITING & PUBLISHING

Use the built-in content publication workflow, or set up your own. The inline edit mode is used by content authors to view the publication status of the front end and they can publish in one click.

DOCUMENT & DIGITAL ASSET MANAGEMENT

Capture, store, manage and retrieve files and digital assets using a CMIS-compliant repository. Take advantage of version history, rollbacks, votes, comments and more.

MULTI-SITE SUPPORT

Multiple sites can be hosted on the same eXo instance. For instance, your intranet, extranet and company website can have the same users, content and applications.

SEO

Implement your search engine optimization (SEO) strategy easily by editing webpage metadata, such as keywords and descriptions, and generating sitemaps and controlling robot properties.

MOBILE

NATIVE IOS AND ANDROID APPS

Our native iPad, iPhone and Android apps integrate easily and securely with sites built with eXo, providing an engaging social collaboration experience on-the-go.

DOCUMENTS

Access your documents that are securely stored in eXo and view them with your device's native document viewers.

NEWS FEED

Keep track of the status updates and changes made by your co-workers that you care about while on-the-go.

INSTANT ACCESS TO DASHBOARDS

Keep an eye on your dashboards. Any gadget you add to one of your dashboards is instantly available on your mobile.

INTEGRATED DEVELOPMENT ENVIRONMENT

WEB-BASED CODE EDITOR

Enable live development of all eXo code via an advanced multi-file editor with code highlighting, formatting and deployment capabilities.

REST SERVICES

Develop, test and deploy RESTful web services using the JAX-RS API with the Groovy language.

WCM TEMPLATE EDITING

Allow live changes to web content templates, html, CSS, JavaScript and Groovy code.

GADGETS DEVELOPMENT

Code, preview, debug and deploy OpenSocial gadgets via the IDE. Use previews and debugging to facilitate mashup development.

STANDARDS & PROTOCOLS

STANDARDS BASED

By using standards, we have reduced lifecycle costs and long-term risk. eXo embraces standards and open specifications wherever possible.

MANAGEMENT AND MONITORING INTERFACE

Monitor and manage eXo internals, such as caches and app speed, using an admin dashboard or through the JMX and REST interfaces.

COMMAND LINE SHELL

CRaSH is an innovative shell for the JVM, giving CLI access to the JVM and it is used to monitor and manage all sorts of internals at runtime.

ENTERPRISE DIRECTORY

Plug eXo into Active Directory or any LDAP-compliant directory to manage your users and groups from a central location.

FTP AND WEBDAV CONNECTORS

Store documents in and retrieve them from the eXo repository through our FTP or WebDAV connectors.

XML IMPORT & EXPORT

Export and/or import data and eXo configurations in a portable and standardized XML format for backups or for a project's lifecycle requirements.

AUTHENTICATION

Use the standard JAAS authentication or integrate a single sign-on (SSO) solution such as CAS, JOSSO, SPNEGO or SAML2.
