

eXo Platform 5

Digital Workplace

Features & Benefits

Digital Collaboration

Profiles & Directory

Add your professional background and skills to your profile. Find co-workers with related or relevant knowledge and experience, and connect to others in your organization through the people directory.

Spaces

Create your own collaboration spaces with dashboards, discussion forums, calendars and documents. Allow any user to create a space and invite other users to join.

Wiki

Meeting minutes, documentation, action plans, reports, a knowledge base and notebooks are some of the popular uses of the full-featured enterprise wiki, which eases knowledge capture and sharing.

Tasks

Distribute, capture, manage and follow work items with our built-in task management system.

Chat & Web Conferencing

Rich chat features that allow your team members to discuss, take collaborative actions, hold real-time meetings thanks to a WebRTC-based web conferencing feature and save meeting notes.

Activity Streams

Keep up to date on the information and activities in your spaces, and follow the activities of the people with whom you are connected.

Document Management

Ensure that you can keep your documents safe and easily find them by moving them to a secure digital environment where you have full control. Access and organize documents easily using folders, tags, categories, and more.

Calendar

Create personal, group and shared calendars with free/busy status, reminders and tasks. Sync eXo calendars with an existing calendar through iCal or CalDAV.

Forum

Support, brainstorm, solicit new ideas or run polls with our full-featured enterprise message board with built-in security, ratings and moderation.

Unified Search

Find any information efficiently with the powerful built-in enterprise search engine. Filter resources by source or type and sort, preview and access it with ease.

Content Management

Content Editing & Publishing

Leverage content templates and the built-in content publication workflow, or set up your own. An inline edit mode allows content authors to view the publication status of the front end and they can publish in one click.

File & Digital Asset Management

Capture, store, manage and retrieve files and digital assets using a CMIS-compliant repository. Take advantage of version history, rollbacks, votes, comments and more.

Site Creation

Build advanced websites by developing or extending templates. Combine inline editing with a powerful back office and a flexible publication workflow and implement your search engine optimization (SEO) strategy easily.

eXo Platform 5

Features & Benefits

Enterprise Portal

Customizable

Page and layout management is easy using drag-and-drop and WYSIWYG editors. The Platform is highly skinnable and you can implement a website with any brand design.

Multi-Site Support

Multiple sites can be hosted on the same eXo instance. For instance, your intranet, extranet and company website can have the same users, content and applications.

Multilingual Support

There is a growing list of supported languages including English, French, German, Italian, Portuguese and Arabic. eXo is easy to localize and has full support for right-to-left text.

Role-based delivery of content and apps

Fine-grained user and group permission management lets you aggregate and display pages, content, gadgets and apps depending on user roles.

Standards & Protocols

Standards based

By using open standards, we have reduced lifecycle costs and long-term risk. eXo embraces standards and open specifications wherever possible.

Enterprise Directory

Plug eXo into Active Directory or any LDAP-compliant directory to manage your users and groups from a central location. Integrate it with known SSO solutions for unified authentication.

Authentication & Single Sign-On

Use the platform's standard JAAS authentication or integrate a Single Sign-On (SSO) solution such as CAS, JOSSO, SPNEGO or SAML2.

Management and monitoring interface

Monitor and manage eXo internals, such as caches and app speed, using an admin dashboard or through the JMX and REST interfaces.

FTP, WEBDAV & CMIS connectors

Store documents in and retrieve them from eXo Platform through our connectors for popular external file repositories.

Mobile

Native iOS and Android Apps

Our native iPad, iPhone and Android apps integrate easily and securely with your eXo Platform site, providing an engaging and full-featured digital collaboration experience on-the-go.

Responsive layout for mobile web browsers

Capture, store, manage and retrieve files and digital assets using a CMIS-compliant repository. Take advantage of version history, rollbacks, votes, comments and more.

Responsive templates to build custom mobile pages

Redefine the mobile user experience, eXo Platform comes with several templates so you can build your own pages or even full mobile-ready websites.
