

# eXo Platform 6

## Your Digital Workplace Solution

eXo Platform is a comprehensive digital workplace solution that connects employees, tools, and information in one employee-centred digital hub.

Organisations use eXo Platform to transform their employee experience and engage their workforce for better performance.

### Workplace communications

Communication teams can use eXo Platform's modern communication tools to implement both top-down and bottom-up communications strategies.

- **Create rich content** articles in minutes.
- **Publish your content** on web pages in activity streams.
- **Engage** users and increase your reach with comments, shares, and likes.
- **Curate content** from your employees or external sources.
- **Manage your content** in the News app.

### Employee productivity hub

eXo Platform connects your employees to company tools, knowledge, and information wherever they are, boosting their performance.

- **Connect each employee** to what is relevant to him or her in a personalised homepage.
- **Save your employees'** time with research capabilities that span the company's entire knowledge base.
- **Access your workplace** securely and remotely, from any mobile device.
- **Be notified** when anything significant happens, and manage the notifications flow.

### Teams collaboration platform

Your business functions and teams can use dedicated spaces to communicate and collaborate on ad hoc projects and manage business communities.

- **Collaborate** using dedicated **spaces**.
- **Store, share, and co-edit documents**.
- **Plan and manage your projects** through collaborative built-in apps.
- **Communicate with your teams** in real-time or asynchronously.
- **Control your space** features, visibility, and access.

### Employee engagement platform

eXo Platform promotes employee engagement through its built-in recognition tools.

- **Value positive behaviours** and add some fun to your employee experience with gamification.
- **Promote a collaborative spirit** with peer-to-peer recognition.
- **Tokenize** your employee engagement.
- **Save your employees' tokens** in a blockchain wallet.
- **Motivate your employees** with token-based gifts and perks.

## Your Digital Workplace Solution

### Features:

## Everything you need in your digital workplace

### Communicate

#### Build your company culture

 **News:** create, share and organise news, announcements, and other pieces of information in specific spaces and work groups.

 **Web content management:** create web pages, centralising information and content from internal and external sources.

 **Enterprise social network:** provide a social hub where employees can communicate with each other and interact with a variety of content through feeds and notifications.

### Empower

#### Boost employee productivity

 **Applications center:** centralise your in-house or third party applications within a customisable, easily-accessed applications hub.

 **Knowledge base / unified search:** capture and organise your company knowledge with multiple easy-to-use channels and sources. Easily locate spaces, files, news, posts and people within your organisation by searching throughout the platform.

 **Mobile:** access your workplace from any mobile device anywhere in the world, and work remotely without loss of efficiency.

 **Real-time notifications:** instantly notify employees about the latest activities through on-site, push, or e-mail notifications.

### Collaborate

#### Ensure your teams efficiency

 **Collaborative spaces:** empower teams and communities to come together in dedicated public or private areas, to collaborate, communicate, and get things done.

 **Document management:** store, organise, share, and co-edit documents.

 **Collaborative tools:** plan, manage, and work on your projects with task management, calendar, chats, and activity streams.

### Reward

#### Drive employee engagement

 **Gamification:** engage employees, encourage and reward positive behaviors through points and badges allocated according to your priorities.

 **Recognition:** enable peer-to-peer recognition with kudos.

 **Digital wallet:** provide each employee with a secure personal wallet to store and manage their earned tokens. Ensure transparency and security of transactions with blockchain technology.

 **Perk store:** reward employees through a marketplace where they can buy perks, provided by the company or other employees, against their earned tokens.
